HOW TO USE THIS GUIDE

ETHS Students and Families:

The ETHS Career Pathways Programs of Study Guide is a resource designed to help students connect their course selection and extracurricular activities to their career interests and plans. The guide utilizes a career pathway framework to outline occupational choices and educational preparation that relate to the various groupings of career fields. The current employment outlook for the United States indicates that most jobs will require postsecondary education and training beyond high school.

Whether a student is preparing to attend a four-year university, a two-year college, the military or the workforce, the exploration of possible pathways is vital. Though many students may continue to change their minds throughout their high school careers about their pathway selections, it is valuable for students to explore multiple areas while still in high school to assist in decisions about where their skills and passions exist.

We encourage students and their families to use this guide and the ETHS Course Request Guide to help choose courses and activities offered at ETHS that will allow students to explore and develop their career interests. Course selection should be purposeful and take into account high school graduation requirements, college admission requirements, and career preparation.

If you have any further questions regarding the ETHS Career Pathway Programs of Study Guide, please contact the ETHS Arts & Innovation Department, Early College & Career Services Department, College & Career Services office, or your grade level counselor.

DEFINING CAREER PATHWAYS

	Agriculture, Food and Natural Resources <p>This pathway is about using your love of science, the environment or animals to prepare for careers that involve improving the quality and safety of food, cultivating and preserving our natural resources, and caring for animals.</p>
	Arts and Communication <p>This pathway focuses on careers in designing, producing, exhibiting, performing, writing, and publishing multimedia content including visual and performing arts and design, journalism, and entertainment services.</p>
	Finance and Business Services <p>This pathway aims to build student skills in communications, information systems/technology, digital literacy, financial procedures, economics, entrepreneurship, international business, principles of management and law, interpersonal and leadership skills, career development, marketing, and more.</p>
	Health Sciences and Technology <p>This pathway is focused on planning, managing, and providing therapeutic services, diagnostic services, health informatics, support services, and biotechnology research and development.</p>
	Human and Public Services <p>This pathway prepares individuals for jobs related to the needs of individuals, groups, and society, leading to career opportunities in education and training, government and public administration, law, public safety, corrections, and security and human services, along with personal care services.</p>
	Information Technology <p>This pathway aims to build student skills in communications, information systems technology, digital literacy, entrepreneurship, interpersonal/leadership skills, career development, computer concepts/programming/networking, web page/media development, and more.</p>
	Manufacturing, Engineering and Trades <p>This pathway includes career paths that use your hands and your mind to invent, construct, or repair cars, machines, buildings, and more.</p>

PLANNING YOUR WILDKIT FUTURE

The current employment outlook for the United States indicates that most jobs will require postsecondary education and training beyond high school.

Whether an ETHS student is preparing to attend a four-year college or university, a two-year college, trade school, the military, apprenticeship or the workforce, the exploration of possible career pathways is vital. Though many high school students may continue to change their minds about their career pathway interests, it is valuable for students to explore multiple areas while still in high school to assist in decisions about where their skills and passions exist.

ETHS students must plan their courses carefully with the assistance from their caregivers and their high school counselor. Long-term preparation begins when students first think about their four-year high school plan. As they progress toward narrowing and clarifying their choices, they must evaluate their own achievement record and check to be sure that they have up-to-date information on the programs that interest them.

The ETHS Student Services team will assist all of our students in exploring career pathways to maximize their experience and development of their ICAP (Individual Career and Academic Plan). For more information about ICAPS visit <https://www.eths.k12.il.us/Page/855>.

For more information about the Illinois PaCE Postsecondary and Career Expectations visit <https://www.isac.org/pace/documents/pace-framework.pdf>

7 ETHS CAREER PATHWAYS

- **Agriculture, Food and Natural Resources**
- **Arts and Communication**
- **Finance and Business Services**
- **Health Sciences and Technology**
- **Human and Public Services**
- **Information Technology**
- **Manufacturing, Engineering and Trades**

There are 16 National Career Clusters. ETHS thoughtfully combined clusters to make 7 Career Pathways to explore. The following examples of ETHS four-year high school plans are career pathway frameworks for discussion with your ETHS counselor. Students may follow a career pathway framework example like the courses below, or select different coursework with the guidance of their ETHS counselor.

AGRICULTURE, FOOD & NATURAL RESOURCES
