## Minutes

- Dr. Bavis provided an overview of the Curriculum Forum highlighting that the purpose of the Curriculum Forum is to provide feedback on proposed courses and not a decision-making body.
- Department Chairs provided brief overviews of course changes and new courses.
- Teacher members asked why the Data Science Course is being proposed in mathematics and not other departments. It was pointed out that in California, Data Science is a math course.
- Members discussed the importance of data science in general in today's world.
- There were no additional questions about new courses/changes.
- Adjourn: 4:40p
